

RITANSHU BABUTA

MERN FULL STACK DEVELOPER • NEXT.JS DEVELOPER

Delhi, India | +91 9958186814 | ritanshubabuta399@gmail.com

PROFESSIONAL PROFILE

MERN Full Stack Developer with 12 months of professional experience building business-focused web applications. Experienced across the full development lifecycle, from responsive React/Next.js interfaces and reusable components to Node.js/Express APIs, MongoDB data workflows, authentication, payment integration, deployment, debugging, and performance optimization. Hands-on experience includes E-commerce platforms, CRM workflows, and an Inventory Management System covering products, warehouses, inventory, stock movements, orders, users, and operational dashboards.

Strong at translating business requirements into working features while maintaining clean component structure, API-driven architecture, database consistency, and usable interfaces. Uses ChatGPT, Claude, Bolt, and Emergent for debugging, prototyping, code understanding, and documentation while independently validating and implementing solutions.

TECHNICAL EXPERTISE

Frontend	HTML5 • CSS3 • JavaScript ES6+ • React.js • Next.js • Tailwind CSS • Bootstrap • Responsive UI • Component Architecture
Backend	Node.js • Express.js • PHP • REST APIs • Server-Side Logic • CRUD • Authentication • Authorization • Protected Routes
Database	MongoDB • MySQL • Database Integration • Query Optimization • Inventory / Order Data Modeling
E-commerce	Product Catalogs • Search & Filtering • Cart • Authentication • Orders • Payment Integration • Inventory Workflows
Business Systems	Products • Warehouses • Inventory • Stock Add/Remove/Transfer • Stock Movements • Orders • Activity Logs • Roles • Excel Export
Tools	Git • GitHub • VS Code • Postman • Vercel • XAMPP • Cloudinary • Postmark • ExcelJS

PROFESSIONAL EXPERIENCE

Associate MERN Full Stack Developer | ADS247365 India Pvt. Ltd.

12 MONTHS

- Developed end-to-end web application features using Next.js, React.js, Node.js, Express.js, and MongoDB.
- Built responsive, reusable frontend components and dashboard interfaces integrated with backend APIs.
- Developed REST APIs, CRUD operations, authentication flows, protected routes, and E-commerce functionality.
- Worked with MongoDB for products, customer data, orders, inventory, and operational workflows.
- Integrated payment gateway functionality and supported debugging, testing, optimization, and deployment.
- Contributed to an Inventory Management System covering products, warehouses, inventory, stock movements, orders, users, logs, and administrative dashboards.
- Worked with product variants, sizes, colors, designs, warehouse-level stock, and operational inventory workflows.
- Used AI-assisted development tools for debugging, rapid prototyping, code understanding, and documentation while independently validating solutions.

Software Development Intern | NCERT, New Delhi

3 MONTHS

- Assisted with inventory and operational management modules.
- Built and optimized frontend/backend functionality using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL.
- Improved database response efficiency and query execution through optimization.
- Participated in debugging, testing, software enhancement, and feature implementation under senior developer supervision.

DETAILED PROJECT PORTFOLIO

VastraDrobe | Fashion E-commerce Platform

NEXT.JS • REACT • MERN • TAILWIND CSS • MONGODB • CLOUDINARY • VERCEL

Modern fashion E-commerce platform focused on product discovery and shopping workflows, with the internal IMS serving as the authoritative product and inventory source.

- Implemented category-based browsing, reusable product cards, product-detail experiences, search suggestions, filtering, and responsive navigation.
- Built Add to Cart, Favorites, account/profile, checkout, product recommendations, carousel, and mobile interaction workflows.
- Integrated product media through Cloudinary and worked on image/video loading and frontend performance optimization.
- Built reusable UI components and optimized rendering and visual overhead for improved page performance.
- Worked on SEO-related sitemap, robots, category, and product routing.

Inventory Management System (IMS) | Business Operations Platform

NEXT.JS • NODE.JS / EXPRESS • MONGODB • JWT • CLOUDINARY • POSTMARK • EXCELJS

Internal operations platform designed to centralize products, warehouses, inventory, stock movements, orders, users, logs, and administrative workflows.

- Developed product management for variants, colors, sizes, designs, descriptions, product details, and media.
- Built warehouse and inventory workflows for adding, removing, and transferring stock.
- Implemented stock movement records for traceable inventory changes and transaction-based operations.

- Worked with product/warehouse/size/color/design inventory combinations and database indexing.
- Implemented JWT authentication, role-based access, activity logging, order status workflows, and Excel stock-movement export.
- Integrated Cloudinary media handling and Postmark transactional email workflows; troubleshoot production deployment/runtime constraints.

CRM System | Customer & Lead Management

NEXT.JS • NODE.JS • EXPRESS • MONGODB

Business-oriented CRM for customer records, lead management, operational workflows, and dashboard-based management.

- Developed responsive dashboards with dynamic data rendering.
- Implemented CRUD workflows for customer and operational records.
- Developed backend APIs and MongoDB integration for structured data management.
- Focused on reusable UI components, accessibility, responsive behavior, and workflow efficiency.

R.K.S Grocery | Live E-commerce Platform

NEXT.JS • REACT • NODE.JS • EXPRESS • MONGODB • TAILWIND CSS

Live E-commerce platform designed to connect local vendors with customers through an online shopping experience.

- Developed responsive storefront interfaces using Next.js and Tailwind CSS.
- Implemented authentication, authorization, payment integration, product/order/cart functionality.
- Built product search, filtering, category browsing, and MongoDB-backed customer/inventory APIs.
- Worked on frontend responsiveness and backend performance improvements.

ENGINEERING CAPABILITIES

Frontend Engineering Reusable React components, Next.js App Router, responsive layouts, Tailwind CSS, rendering considerations, search/filter experiences, mobile interactions, and UI performance.

Backend Engineering REST APIs, validation, authentication, authorization, CRUD workflows, business logic, server-side operations, API integration, and cross-layer debugging.

Data & Inventory MongoDB data workflows, product variants, warehouse stock, stock movements, database indexing, and synchronization between operational and customer-facing systems.

Production & Deployment Git/GitHub, Vercel, environment configuration, production debugging, API connectivity troubleshooting, media hosting, and runtime/performance investigation.

TRAINING & CERTIFICATIONS

MERN Full Stack Development Training — QSpiders | Approximately 6 months

React.js • Next.js • Node.js • Express.js • MongoDB • JavaScript • HTML/CSS • APIs • Authentication • Responsive UI • Debugging • Database Connectivity

Android App Development Masterclass — Udemy • Basics of React JS — Infosys
